Avast Premier

NITRO UPDATE

Complete, top-of-the-line security and the best Avast has to offer — made faster and more powerful with Nitro in the engine. Avast Premier - Nitro Update improves your home network scanning, offers automatic software updates, stops redirects to fake websites, safely shreds data, and features the world's most secure browser®, so you can shop, browse, or bank safe from hackers and online ads. It's the ultimate protection, from the most-trusted security provider in the world. With nothing to fear, there's no holding you back.

KEY FEATURES - AVAST PREMIER

UNIQUE FEATURES

new! CYBERCAPTURE
This proprietary, cutting-edge technology detects and captures unknown files to keep you one step ahead of cyber threats as they evolve. Potentially dangerous files are sent to the Avast Threat Labs for real-time analysis by our experts — and quarantined if dangerous to keep you safe.

new! SAFEZONE BROWSER
Designed to make browsing safer and more convenient, SafeZone is the world's most secure browser®. Bank Mode makes sure you shop and bank in total privacy, Ad Blocker keeps annoying ads at bay, and Video Downloader lets you watch your favorite videos offline -- whenever you want.

improved! HOME NETWORK SECURITY
Even better protection for all the devices on your home network. The Avast Nitro update detects even more router vulnerabilities than before, so you can keep your Wi-Fi cameras, connected TVs, printers, network drives, and routers fully secured.

AVAST PASSWORDS
It's time to get over bad habits like storing passwords on your browser or reusing the same one over and over again. Avast's new password manager creates a safe, convenient space to store your passwords, which you can access with one master password.

SECURE HTTPS SCANNING
Improved WebShield technology allows your Avast to scan all HTTPS sites for malware and threats. It whitelists your banking sites and bank certificates too, so that scanning doesn't slow your access one bit.

BROWSER CLEANUP
Why let anyone change your search provider without your permission? Browser Cleanup gets rid of any bad add-ons and unwanted toolbars, so you can restore the settings you like.

SECURE DNS PROTECTION
DNS hijacking is real — and hackers know what they're doing. It's easy to accidentally type all your login details into a replica of your banking site. SecureDNS encrypts the connection between your PC and our DNS server so you won't fall for any fakes.

LIGHT, POWERFUL PROTECTION

unique! 230 MILLION USERS
As the antivirus of choice for 230 million users around the world, we find malware fast and respond even faster — no matter where it starts. By combining massive data engines running AI software with some of the smartest virus spotters in the world, we constantly double- and triple-check the latest threats to keep you safe.

improved! ANTIVIRUS AND ANTI-MALWARE
We continue to improve the world's most trusted antivirus and anti-malware engines to keep you better protected. Using security updates the size of a text message, we distribute updates several times an hour to keep you completely up-to-date.

SANDBOX
Downloaded something you're unsure of? Sandbox lets you run apps, watch videos, or check websites in an isolated space so you don't harm the rest of your computer. If your download is safe, move it onto your machine; if not, your computer is safe and you've risked nothing.
FIREWALL
Stop hackers getting unauthorized access to your computer. Avast's silent firewall quietly filters the data that reaches your computer, eliminating known threats — and isolating those that seem suspicious.

SYSTEM REQUIREMENTS:

PC:
Processor Pentium 4, 256 MB RAM,
2 GB of free hard disk space
Microsoft Windows XP SP3/Vista/7/8/8.1/10
(32/64 bit)

WINDOWS 10 COMPATIBLE
Avast Nitro Update is Windows 10 compatible.

FAST AND CONVENIENT

SMART SCAN TECHNOLOGY
An all-in-one scan, all in one go. Check your computer's operating status, make sure there are no network threats, malware or viruses, and search for outdated software in just one click. It's the easiest way to stay safe.

SOFTWARE UPDATER
Hackers love to exploit old software. Software Updater lets know whenever there is an update to the software you're running — so you can quickly patch any weak points before hackers have a chance to attack.

DATA SHREDDING
If you don't want anyone seeing the files you deleted, get rid of them for good. Data shredding is the only way to make files truly irretrievable, so you can keep your privacy, even when you sell or lend your computer to others.

OTHER FEATURES

NOW OPTIONAL ANTI-SPAM
A powerful spam and phishing filter to keep your inbox clean, lean, and safe. Works as a plug-in to MS Outlook and as a generic POP3/IMAP4 proxy for other email clients.

MY AVAST INTEGRATION
Phone, PC, and tablet all protected by Avast? Great! You can control and manage all your devices directly from within the Avast product console.
