DATA SHEET

Avast Business Cloud Backup

Protect your business data. Never pay a ransom. Total peace of mind.

Your endpoints will experience lost and corrupted data, or come under attack. It's not a question of if… it's just a matter of when.
With growing remote workforces, increasing threats of ransomware, and expanding compliance needs, the risk that endpoints face has never been higher. SMBs cannot keep up and the bad guys know it! Ransomware has exploded 400% between 2018-20201. Every company needs a secure, simple to configure, and easy-to-manage endpoint data protection solution.

Avast Business Cloud Backup Service keeps data secure and ensures business continuity by protecting devices with an automated backup process that is easy to deploy and manage. Quickly set up backup schedules on devices, centrally manage everything from one dashboard to ensure all data is backed up and available, and easily recover data in the case of an unexpected event.

Benefits

SECURITY	EASE OF USE	MANAGEMENT
Protection from ransomware	Back up the most critical data as often as every hour	Automate installs
AES-256 encryption	Back up from wherever you work	Centralized, intuitive dashboard
File version history	Restore quickly and with ease from the Business Hub or user's computer	Fast uploads and recoveries
Unlimited file versioning		Reporting and alerting

ALL IN THE CLOUD - NO HARDWARE REQUIRED

Features

Selectable backup

Choose exactly what you want to back up and what could be left behind. A variety of options allows you to precisely define your backup criteria by file type, folder destination, and file size. You can also choose to exclude data that you do not need to back up in order to reserve your cloud storage to business-critical data. Once defined, just set how often you'd like to back up your data and you are done.

Internet speed

To prevent negative impact on internet speed and employee productivity, Cloud Backup can be set up to work seamlessly with your natural business workflows.

Simple deployment

Deploying Cloud Backup is a one-click solution. Once the Avast Business agent is installed on a device, you can remotely deploy our Cloud Backup service right from the Business Hub. You also have the option to send out an email with installation instructions, or download and install the service via exe/msi installer.

Automatic Encryption

Protect data during every stage of the backup and restore with automatic AES 256-bit encryption of files in transit and in storage.

Cloud storage - accessible from everywhere

All backups are stored in the cloud and are accessible anytime, anywhere. Recover data right away, whenever you need.

Comprehensive Reporting

Get insightful data about the operability of backup. Backup history, storage usage, anomalies in backups, and more are available for you in real-time.

Files Versioning

Whenever a file that is set to be backed up is changed, a new version is uploaded to cloud storage. Not only will you always have the latest version of the file available, but you also have the previous version ready to be restored whenever you need.

Restoration

You can choose from various options for how to restore data. Push data straight to the desired device remotely, download it as an archive, or download it through a local agent on a device.

Available in the Avast Business Hub

Our Cloud Backup Service is delivered through the Avast Business Hub security platform. The Business Hub helps IT professionals monitor threats and deliver layered security services to multiple offices, networks, and devices. Business Hub's powerful combination of endpoint and network security services provide an unparalleled level of protection, in a central platform, where you only pay for the security services you need.

About Avast Business

Avast delivers all-in-one cybersecurity solutions for today's modern workplace, providing total peace of mind. Avast provides integrated, 100% cloud-based endpoint and network security solutions for businesses and IT service providers. Backed by the largest, most globally dispersed threat detection network, the Avast Business security portfolio makes it easy and affordable to secure, manage, and monitor complex networks. Our easy-to-deploy cloud security solutions are built to offer maximum protection businesses can count on.
